SKILLS

Frontend

React.js · TypeScript · JavaScript · HTML · CSS · Tailwind CSS

Backend

Node.js · Python · MySQL · MongoDB

AI / ML

Gradient Boosting · LSTM · XGBoost

Tools & Other

Git · GitHub · REST API · Responsive Design

CERTIFICATIONS

- IT Specialist – Python (Certiport)
- Junior Web Developer (Pengembang Web Pratama)
- MyDigiLearn – IoT Fundamental
- MyDigiLearn – Scrum Mastery

Ferdiansyach

Fullstack Developer & Data Analyst

PROFESSIONAL SUMMARY

Passionate Fullstack Developer and Data Analyst currently pursuing a degree in Information Systems at Universitas Nasional. Strong foundation in both front-end and back-end technologies with expertise in building responsive web applications and developing predictive AI models. Experienced in leading techno-economic analysis on smart building energy efficiency using Gradient Boosting and LSTM models. Proven ability to contribute to cross-functional teams, mentor peers on modern web technologies, and deliver production-ready solutions using React.js, TypeScript, Node.js, and Python.

EXPERIENCE

Business Development Intern
Apr 2025 – Sep 2025

Telkom Indonesia

Jakarta Selatan, Indonesia

Led techno-economic analysis on smart building energy efficiency at Infranexia Telkom. Developed a predictive AI model using Gradient Boosting and LSTM to detect energy consumption anomalies. Contributed data-driven insights for business development strategies.

Computer Lab Assistant
Sep 2024 – Sep 2025

Lab Data Monotize

Jakarta Selatan, Indonesia

Provided technical support and mentoring to students in data-related coursework. Managed lab resources and assisted in hands-on sessions covering databases, programming, and data analysis tools.

Research & Development Assistant
Jun 2024 – Mar 2025

HIMASI — Information System Student Association

Jakarta Selatan, Indonesia

Contributed to the R&D division by researching emerging technologies, organizing tech-related events, and supporting knowledge-sharing initiatives within the student community.

Full-stack Developer
Apr 2024 – Mar 2025

Universitas Nasional Festival (UNAS FEST)

Jakarta Selatan, Indonesia

Designed and developed the official UNAS Fest website using React.js, TypeScript, and Tailwind CSS. Handled both front-end and back-end integration with Node.js, ensuring a responsive and performant user experience.

EDUCATION

Bachelor's Degree — Information Systems

Universitas Nasional (UNAS)

November 2022 – 2026 (Expected)
